- Model: FT-10
- Testing Stations: 10
- Drip Pipe Diameter: 12-20MM
- Operation: fully automatic
- Dripper Type: NON-PC, PC, ND
- Irrigation type: round, flat, tape
- Results: excel spreadsheet
- Interface: PC touchscreen

DRTS FT-10 automatically tests 10 drip samples at desired test pressures. Tests are fully configurable for up to 25 test pressures including a test for anti drain (CNL, ND) drippers. Simply connect the samples choose one of the tests and minutes later you have all of the relevant data for the dripper samples including flow rate, CV, temperature, pressure etc. The FT-10 has a built in computer that has an easily accessible USB port for quick extraction of files and can even be placed on a company network.
